1 METHODOLOGY

1.1 Background

Bagmati Municipality was formed after the declaration of local levels by Nepal Government on 2073 by merging 4 previous VDCs (Dhungrekholra, Karmaiya, Rajghat and Shankarpur). For the complete understanding of the current status of the local level all the data in initial VDC/ Municipality level or Municipality level should be arranged in the patterns of newly formed local structure. So, each individual local level can formulate their plans by targeting the needy groups of the society. The profile needs to be prepared including the socioeconomic, cultural, environmental and many more aspects.

1.2 Objective

The main objective of this study is to provide data on social, economic, geographical and other areas for the purpose of formulating the Profile of Bagmati Municipality. Another objective is to help in analysis and evaluation of the Municipality objective description by providing information and statistics. Other special objectives are as follows:

- Providing an objective description of the Municipality.
- Informing about the economic, social, infrastructural, geographical and political environment of the Municipality.
- Analyze the Municipality's different resources' availability and conditions.
- Providing unified description of sector wise offices and organizations of the RM.
- Analyzing sector wise development possibilities of the Municipality.
- Providing information of the Municipality's overall sectors to formulate the Municipal's periodical or annual plans.

1.3 Method

To prepare this document, first of all an information collection form was formulated as per the format provided by Ministry of Local Development, Nepal. All the team members from surveyor collected data from individual household. Along with that, plans, policies and other publications of sector wise offices were also collected. Qualitative data is also collected through direct meeting with experts of sector wise offices, professionals in organization and interested scholars of the district and with the help of national publications. Other information is collected from annual progress report of sector wise offices and also collected the reports prepared by DDC are analyzed by expert team using various instruments.

1.4 Limitation of Study

There has been maximum effort to represent the data according to the guideline. Some of the information according to the guideline has been limited due to the change in governance pattern and the current structure is not in its fully functioning phase.

1.5 Time Frame:

The household survey was started in first week of Bhadra 2075 and ended up in last week of Poush 2075. But the households that left to collect data, we collected up to last of Ashadh 2076. So actual data covers from first week of Bhadra 2075 to last week of Ashadh 2076.

2. INTRODUCTION

2.1 Background

Bagmati Municipality got its name from the Bagmati River in western part of Sarlahi District and District Border of Sarlahi and Rautahat. Bagmati River is Hindu religious holy river as well as. The eastern bank of this municipality is covered with Harion Municipality and south side of this Municipality is Barahathwa Municipality. The north side of bank is bordered with Sindhuli District.

Bagmati Municipality lies in Province no.2 and was formed after the declaration of local levels by Nepal government 2073 by merging 4 previous VDCs (Dhungrekhola, Karmaiya, Rajghat and Shankarpur).

The total population of this municipality as up to the last survey of last of Ashadh 2076 is 47,007. The population density as such is found to be 464 person per sq. km. Geographically the topography of this Municipality is Terai-A lowland region in southern Nepal and northern India that lies south of the outer foothills of the Himalayas that consists of old and new alluvium, both of which constitute alluvial deposits of mainly sand, clay, silt, gravels and coarse fragments. The new alluvium is renewed every year by fresh deposits brought down by active streams, which engage themselves in fluvial action. Old alluvium is found rather away from river courses, especially on uplands of the plain where silting is a rare phenomenon. The Road network has touched almost all the wards however; most of the roads are Gravel roads and some roads are black topped.

Ethnically this municipality has a large population of Tamang followed by Chhetri and Magar whereas Yadav, Newar, Dusad, Mandal, Thakuri etc. population of other ethnic composition such as etc. also reside in the municipality.

Topographically, ward no. 1 and ward no. 11's some parts are laid in the height of hills whereas other wards lie in the plain part. Ward no. 11, 12 4, 5, 6, and 7's western parts is situated in the banks of Bagmati river.

Ward No. 8 is the major market center where trade and agriculture are the major source of Income. Among 12 numbers of wards almost all the wards are mostly dependent only upon agriculture for income.

The prospect of tourism is very good for the municipality being already lay down on the bank of Bagmati River. However; possibilities extend now but hope to cover internal and external tourists in upcoming days.

2.2 Geo-Physical Characteristics

2.2.1 Location

2.2.1.1 Relative Location

Bagmati Municipality lies on the borders of previously Sindhuli and Rautahat district. At present following are the borders of Bagmati Municipality:

East: Harion Municipality

North: Sindhuli District

West: Rautahat District

South: Barahathwa Municipality

2.2.2 Administrative and Political Division

Under the new structure the former 4 VDCs were merged together to form a single Bagmati Municipality at 2073 BS which is then further divided into 12 wards.

Ward Division of Bagmati Municipality:

Table No. 1

New Ward Number	Former VDC/s	Wards of former VDC/s
1	Dhungrekhola	1, 2, 4
2	Dhungrekhola	5, 6, 7
3	Dhungrekhola	8, 9
4	Karmaiya	7, 8, 9
5	Rajghat	6, 7, 8
6	Rajghat	4, 5, 9
7	Rajghat	1, 2, 3
8	Shankarpur	3, 4, 5
9	Shankarpur	1, 2, 6, 8
10	Shankarpur	7, 9
11	Karmaiya	4, 5, 6
12	Karmaiya	1, 2, 3

2.2.3 Physiographic:

Table No. 2

Particulars	Description
Total Area	101.2 SQ. km
Altitude from sea level	60m to 600m
Average annual rainfall	1899.6 mm
Average Annual temperature	Hi 31+° Low 20°
Climate	Lower Tropical and Upper Tropical
Main Rivers/Khola	Bagmati River, Dhungrekhola, Godari Khola, Sukekhola
Irrigation	Bagmati Irrigation Project

2.2.4 Geomorphology and soil texture

Most of the part of Bagmati Municipality lies in the “Terai” region but some parts of municipality lie in the “Bhawar” region which also known as “Char Kose Jhadi”.

2.3 Cultural Aspects

Having a diverse topography, there is a diverse set of ethnic group and castes as referred to in section 3.1.3. However; Yadav, Koiri, Tamang, Magar, chhetri etc. are the indigenous groups of people who initially inhabited different parts of this Municipality. Significant historic, mythological and religious places are presented in the sections below.

2.4 Main Festivals

Decorated by many ethnic groups speaking a number of different languages as mother tongue, Bagmati Municipality is culturally rich and has a diverse array of religious and traditional festivals celebrated at different times of years by different ethnic groups. However, the community has settled with peace, love and non-violence and are enthusiastic in all the celebrations celebrated by each ethnic group.

Dashain, Tihar, Chhath, Janai Purnima, Fagu Purnima, Baisakh Sakranti, Maghr Sakranti, Shivaratri, etc. are celebrated by all the ethnic groups who follow Hinduism. Buddha Jayanti, Lhosar, etc. are celebrated with high enthusiasm by the Buddhist community. Bakar Ed is celebrated with high enthusiasm by the Muslim community.

Christmas and Ester Sunday is the major festival celebrated by Christians.

There are some Jatras, Melas and other festivals that are significant and unique to this municipality such as Karmaia Mela, Gumba Mela, Krishna Ashtami Mela, Indra Jatra etc.

4 ECONOMIC DEVELOPMENTS

There are several aspects to economic factors that have been considered in the development of this document including yearly agricultural production, tourism scenario, pocket area farming, livestock farming, local businesses and industries and financial organizations working in the area.

Among the financial institutions, A class certified banks and remittances were found to exist mostly in Bagmati, Solti, Khalte bazar, Milan Chowk and Adarsha chowk, while in other ward, co-operative institutions have been established that have been providing financial and other assistances such as savings, loan and agricultural capacity building, etc.

From the general consultation with the local people, it was found that agriculture is the major source of income, followed by remittance, labor, etc.

4.1 Yearly production of Agricultural products:

Agriculture is the major employment in Bagmati Municipality. Among various production some are listed below with their production. Note: these data are collected in average basis upon households. Following table shows that the group of less than 10 quintal and 5 quintal production annually is greater than any other production group regarding DHAN, MAKAI and UKHU.

धान		Frequency	Percent
	५ क्विन्टल भन्दा मुनि	418	31.01%
	५०० क्विन्टल भन्दा मुनि	3	0.22%
