Project Introduction

Doric Villa Engineering Consultancy was awarded the Project; Detail Topographical Survey, Calculation of Excavated Material form Pond 1 and Evaluation of Used Quantity of Bagmati Fishery Pond by Bagmati Municipality, the office of the Municipal Executive, Madesh Province, Karmaiya, Sarlahi.

Bagmati Municipal Executive has been building the Bagmati Fishery Pond at Wards No. 4 and 12 of the Bagmati Municipality. The Pond is intended to be served as the Artificial Lake to attract Tourists for boating, Fish Farming and to develop the whole premises of 150 Bigha as the major tourist destination of the Municipality. The Project is in the construction process and the excavation work is carried out for the first project and the Surrounding Counterfort wall is under construction as well.

Execution of Scope of Work

During the Project Execution, ToR was thoroughly followed. The main objection; Calculation of excavated material form Pond 1 and Evaluation of used quantity for the same project was analyzed using MS Excel 2020, Autodesk Civil 3D using the base topographical Survey data provided by the Bagmati Municipality and Topographical Survey Data taken after the completion of Excavation of Pond 1.

Material excavated for the Pond 1 Earthwork has been used to fill the road around the pond, the shop area at north-east and Public Toilet Area at south.

Methodology

Desk Study

This study had been conducted in two parts:

Firstly, study was carried out to know the status of the project, about proposed site, design level, various criteria and other relevant terms and conditions. Initial pre-meeting with the Bagmati Municipality Officials and technical bodies was held and methodology for the work was discussed in detail.

The desk study was carried out through the collection of available reading material and publications about the study area, topographical maps and other data available in respect of geology, geomorphology and hydrology and others related to the required design conditions. The concerned institutions/sources for collecting these data was Office of the Municipal Executive, Bagmati Municipality, Department of Survey, Maps & Publication regarding the Project area.

Field Study and Investigation

Reconnaissance

The field visit and gathering the relevant information and data from detail survey and previous HPP was done. This field visit was done along with the technical team and the elected representatives of Office of the Municipal Executive, Bagmati Municipality.

Topographical/Detail Survey

After the reconnaissance of the project sites the detail topographic/Detail survey of the total project area and Excavated Level of Pond 1 was executed..

The survey was done in digital format with x, y, z coordinates of all survey points.

The jobs done during topographical survey can be listed as:

- 1. The contour of 1m. interval and of 0.5 m interval wherever necessary with spot levels at all important points will be drawn.
- 2. The details of all the existing structures with close polygon format will be shown.
- 3. All the electrical, telephone, sewer line etc. passing through the surveyed area will be shown.
- 4. All the bench marks, traverse lines, reference line and reference points with respect to which the present topographical map is to be prepared will be shown.
- 5. The present land use will be shown.
- 6. Other Information needed for design, planning and construction purpose will be also collected.
- 7. Topographical map hard copy will be prepared in 1:500 scales. All the benchmarks established will be shown in map.
- 8. The reduced level and coordinates will be transferred from the nearest permanent survey station i.e. Central Grid.

75/2021

1111 photographs was taken.

Eexcavated Quantity Calculation

Eexcavated material form Pond 1 and Evaluation of used quantity for the same
was analyzed using MS Excel 2020, Autodesk Civil 3D using the base topographical
data provided by the Bagmati Municipality and Topographical Survey Data taken
at the completion of Excavation of Pond 1.

Topographical Survey data and current data obtained from the Theodolite was
analyzed in the Autodesk Civil 3D and Quantity was analyzed.
